OBJECTIVE

Aspiring Data Scientist and Artificial Intelligence undergraduate with strong foundations in Python, SQL, and data analysis. Seeking an internship to leverage analytical skills, build scalable data-driven solutions, and contribute effectively to innovative AI and machine learning projects.

EDUCATION

IIMT Group of Colleges

Bachelor of Technology – Artificial Intelligence & Data Science

Greter noida, India

Jan 2025 – May 2029

– Relevant Coursework: Data Structures & Algorithms, Machine Learning Fundamentals, Database Management Systems, Statistics for Data Science, Linear Algebra

Training Ya

Professional Training – Data Analytics, Artificial Intelligence & Data Science

Online / Remote

Sep 2025 – Sep 2026

* Intensive program covering end-to-end data analytics pipelines, supervised and unsupervised ML models, and business intelligence tools

Senior Secondary (Class XII – BSEB)

Science (PCM)

Rajkiyakrit Sarvodaya +2 High School

2023

TECHNICAL SKILLS

Languages: Python, SQL

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Tableau

Machine Learning: Scikit-learn, Regression, Classification, Clustering

Databases: MySQL, PostgreSQL, SQLite

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Concepts: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Data Visualization, Statistical Analysis

PROJECTS

Customer Churn Prediction | *Python, Scikit-learn, Pandas, Matplotlib*

- * Built a binary classification model to predict customer churn using logistic regression and random forest, achieving 85%+ accuracy on test data
- * Performed end-to-end EDA, handled class imbalance using SMOTE, and visualized feature importances to derive actionable business insights

Sales Dashboard – Tableau | *Tableau, SQL, Excel*

- * Designed an interactive Tableau dashboard to track KPIs including monthly revenue, regional sales, and product category trends
- * Wrote optimized SQL queries to extract and transform raw transactional data from a relational database for visualization

Movie Recommendation System | *Python, Collaborative Filtering, Pandas*

- * Implemented a content-based and collaborative filtering recommendation engine using cosine similarity on a 10,000+ movie dataset
- * Reduced cold-start problem by combining user ratings with genre metadata to improve recommendation relevance by 20%

ACHIEVEMENTS & ACTIVITIES

- Completed **Google Data Analytics Professional Certificate** (Coursera) – covering data cleaning, SQL, R, and Tableau
- Solved **100+ SQL problems** on LeetCode and HackerRank, focusing on window functions, joins, and query optimization
- Active member of the college **AI & Data Science Club** – participated in peer workshops on ML model deployment
- Completed online courses in **Machine Learning** (Andrew Ng, Coursera) and **Python for Data Science** (IBM)

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera
- Python for Data Science, AI & Development – IBM / Coursera
- Machine Learning Specialization – DeepLearning.AI / Coursera
